

Software & Engineering Courses

offered by Fekete

Taking a course from Fekete will enhance your industry education and provide you further insight into optimization opportunities for your company's operations. Our courses not only provide you software instruction, but also access to our technical experts for engineering advice on your current projects.

A Fekete course is an environment in which you learn new methodologies by analyzing real data from actual case studies conducted by Fekete. This will give you the confidence to apply these new techniques in your day to day work.

Please check our website for details on all of the courses offered by Fekete or email us at courses@fekete.com.

Our New Office in Houston, Texas

Fekete is pleased to announce that our new office in Houston, Texas opened in July 2011. This will allow our software sales and support personnel to provide a higher level of service to our clients working in locations across the United States.

Over the past several years, we have realized that our software training and support is less often about how to navigate software and more about completing a task. With the growing portfolio of unconventional resources that many companies are focused on, this trend towards "workflow" training is increasing. Having analyzed hundreds of unconventional wells for our clients, we are more than happy to share our experience and work one on one or in a group to develop these workflows with our clients. Our team based in Houston will provide greater accessibility to this kind of training and support.

Our Houston office is managed by Casey O'Shea and Kevin Dunn. Casey serves as the

Vice President of Business Development at Fekete, and was the primary software design engineer on the Fekete Harmony™ environment, which hosts Fekete's F.A.S.T. RTA™ and the new F.A.S.T. DeclinePlus™ software. Casey will be leading the technical team providing support, training, and assisting with client integration. Kevin is the Vice President of Sales and Marketing, and is responsible for the account management team who will ensure you have the right software tools in place and coordinate training sessions. Graham Helfrick, Mike Hwozdecki and Dan Popp have all relocated to Houston and we expect to be hiring more engineers and account managers over the months ahead.

For more information, please contact us at 281.833.6700 or fast@fekete.com.
